

# Liu Wenbo, PhD., Presents His Research on Green Synthesis of APIs at Hiray

Sep. 21, 2021

Hiray Pharma Solutions' vision is to develop into a world-class API&CDMO enterprise. We understand that in order to become a world-class enterprise, we need world-class talent. For this reason, in addition to continuing our cooperation with domestic universities and research institutions, we have signed a contract with Professor Liu Wenbo, PhD, as chief consultant scientist. Dr. Liu is a professor at the prestigious Wuhan University, and the supervisor of Wuhan University's School of Chemistry and Molecular Sciences.

On September 21, 2021, Professor Liu Wenbo gave a lecture on the topic of "Reaction Development and Green Synthesis of APIs" to the company's R&D and quality team in the HIRAY TALK lecture forum. In his lecture, Dr. Liu shared the research topics and directions of his research team in the international professional field. He also recommended some synthesis methods based on Hiray's current

product and business development, opening the way for further cooperation, and building a solid foundation for the development of Hiray Pharma Solutions low-molecular-weight medicines.

Hiray Pharma is committed our working philosophy of "Reverence for Life, Safety First, Quality Always, and On-Time Delivery."
